

# In Class Exercise-2

## (Pair Programming)

---

**Deadline: 08/31/2018 11:59PM through the ICP submission form**

### **Guidelines:**

- Only one submission per ICP team
- The one who is submitting should include their partners wiki document link in the documentation

Create a single page application using bootstrap framework

1. The page should have two text fields that takes state code for example: MO and city name: Kansas City
2. Pass those values and display weather details of the city like temperature and weather condition for next 5 hours.

### **For Reference:**

[http://api.wunderground.com/api/4bbbc25f4f5946dd/hourly/q/state code/cityname.json](http://api.wunderground.com/api/4bbbc25f4f5946dd/hourly/q/state%20code/cityname.json)

Two letter state abbreviation codes:
